

## View Factor: Task 1

The image shows two circular bodies. The body 1 is completely inside of body 2. Diameter of body 1 is half of diameter of body 2. What is  $\phi_{11}$ ?

1

$$\phi_{11} = 0$$

2

$\phi_{11}$  means what percentage of Body 1 sees Body 1 (itself). For a convex surface, no radiation can leave the surface and then hit later, because radiation travels in straight lines. Hence, for convex surfaces,  $\phi_{11}$  is zero.
