

## View Factor: Task 29

The image shows a three-quarter circular body. Angle is  $90^\circ$ . What is  $\phi_{33}$ ?

1

$$\phi_{33} = 1 - 1/3 * 4/\pi$$

2

Due to symmetry  $\phi_{3,1} = \phi_{3,2} = 2/(3\pi)$  and from enclosure  $\phi_{3,1} + \phi_{3,2} + \phi_{3,3} = 1$ .
