

View Factor: Task 30

The image shows a semicircular body with radius r . The length of body 2 is equal to r , and the length of body 3's patches is $\frac{1}{2}r$.

1 $\phi_{12} = 1/\pi$

2 Due to the reciprocity rule, $\phi_{1,2} = (A_2/A_1) \cdot (\phi_{2,1})$ is applied because $\phi_{2,1}$ is known as 1.
