

Lecture 04 - Grashof 06

Give an expression for the Grashof number Gr , in terms of the given variables.

Grashof number:

$$\text{Gr} = \frac{g\beta(T_s - T_\infty) L_c^3}{\nu^2}$$

Where the kinematic viscosity can be expressed as:

$$\nu = \frac{\rho}{\mu}$$

And the characteristic length for the sketched situation:

$$L_c = a$$

So:

$$\text{Gr} = \frac{\rho^2 g \beta (T_s - T_\infty) a^3}{\mu^2}$$
