# Surface Brightness: Task 34

The diagram shows the distribution of black body radiation with respect to the wave length.

1 $\dot{q}''_{b,\lambda_1 \to \lambda_2} = \dot{q}''_b(F_{0 \to \lambda_2} - F_{0 \to \lambda_1})$

2 An expression for radiation in interval $[\lambda_1, \lambda_2]$ is obtained by black body radiation $\dot{q}''_b$ and function $F_{0 \to \lambda_i}$, which gives the corresponding fractions.
